Clothing manufacturing, design & development company

WHO WE ARE

Established as a family company in Istanbul in 2007, EDSA with its production volume, product variety and competitive price policy, is today one of the most important export companies in Turkey. With its gradual growth model prioritizing the core values which are people and environmentally friendly, EDSA, one of the preferred companies in the sector, is also Turkey's top 50 exporting companies in the field of apparel and ready-made clothing.

By showing a sustainable growth thanks to its technological-based investments in the country, Edsa continues its production activities in self-owned facilities in İstanbul and Kırklareli.

With existing business management and design teams based in İstanbul ,Dusseldorf and New York, it produces fast and on-site solutions to the needs of its customers. All the process from design to delivery of the products to the stores is followed on-site meticulously.

With its headquarter in İstanbul, our company operates in a closed area of 30,000 m2 in total, including its production facilities in Kırklareli producing all kind of ready made jersey garments like sweatshirt,printed tee,leggings, shorts, sleepwear for women, men and children. In our customers' stores throughout 20 countries. You can easily come across the pieces with various private labels and our brand labels came out from EDSA's production lines.

SECRET OF SUCCESS

Our priority has always been "Do the right job at the right time and for the first time". Acting with this principle, first of all, with correct planning and correct sourcing. We even choose by ourselves the cotton to be used in the production of the style to be produced. The longest fiber allows the best result in dyeing. Good dyeing creates the best quality of fabric. This chain is the starting point of a customer satisfaction. Producing the best quality each time, loving the quality products produced and loving your job is the key to success.

Gold Award 2022 for
EDSA TEKSTIL from IHKIB

The fabrics arriving at the facility are primarily checked for colour, weight and handfeel as well as shrinkage value and colour fastness against internationally accepted quality standards. Fabric batches approved for the production are given to cutting department. Then they are laid down by automatic fabric laying system with appropriate tension onto fully automatic cutting machine. In our cutting department, there are 6 air aspirated cutting table with a length of 28 meters and 2 fully automatic Cutting Robots. Daily an average of 50,000 products are cut. After cutting process, cut pieces are 100% sorted and labeled before passing to the next process.

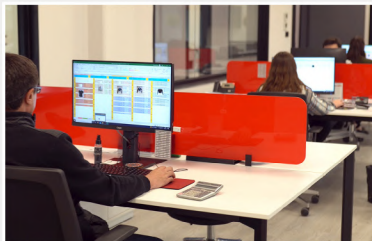

The annual total capacity of the production lines in our facility is 40.000.000 minutes. Our products, which are produced according to AQL 1.5, AQL 2.5 and AQL 4.0 standards based on our customers' requirements are 100% Turkish origin using natural, clean and pure 100% Combed Cotton yarns of the Mediterranean and Aegean Regions. We are also using Polyester, Viscose, Linen and recycled yarns as needed and our OCS and RCS certifications are has been completed. We get our fabrics dyed by the dyeing mills having sustainable policies, respect for environment, nature consciousness and OEKE-TEX Certificates using dyestuffs that do not contain AZO and FORMALDEHYDE

Our company is also a member of SEDEX and amfori BSCI Class B approved manufacturer.

*‘ journey from
history ’*

Thanks to our rooftop Solar Power Plant in our production facility, which was completed in December 2022, all of the products produced on the production lines in our factory are produced with 100% solar energy and continue their activities without harming the environment and nature with zero carbon emissions.

As of the 2023, **520 tons** of carbon emissions were prevented, **440 tons** of standard coal fuel was saved and environmental benefits equivalent to planting **707 new trees** were achieved.
